The taste of quality worldwide

BRAVILOR BONAMAT

You can taste the quality

The professional fresh brew series of Bravilor Bonamat brews coffee from ground coffee or coffee beans, depending on which machine you choose. At Bravilor Bonamat our aim is always to ensure you receive a high quality product. Therefore the fresh brew series is made of high-quality materials and is energy efficient; its been given energy rating “A” in accordance with the industry standard EVA-EMP3.0b. The machine is user-friendly and easy to operate. Moreover the design of the fresh brew machine makes it a real eye-catcher; with its sleek stainless steel design and backlit display it’s at home in every environment.

Featuring

- Individual drink settings — e.g. you can set the volume (ml) of each beverage.
- Low maintenance services — thanks to the automatic descaling and rinsing programme.
- Unique hot water system — the machine is less sensitive to scaling.
- Smart counters — warn you when the waste bin is full or descaling is necessary, and show you the daily/cumulative use.
- Separate hot water outlet.
- Sliding drip-tray.
- Choice of volume — choose your own size of cup, mug or decanter.

FreshOne

The perfect solution for serving cups, mugs and decanters of black coffee at the push of a button. This machine features only a single large canister for ground coffee. It also has a separate hot water outlet for tea. With its choice of Mild, Regular, Strong and Extra Strong the FreshOne satisfies everyone’s personal taste in coffee.

FreshOne G

The FreshOne G is similar to the FreshOne, but features a single large canister for coffee beans. The FreshOne G has a high-quality grinder ensuring that each cup of coffee is prepared using freshly ground beans, thereby improving the quality and freshness of your cup of coffee.

In-cup quality

Bravilor Bonamat uses paper filters supplied on a roll. This means that every single cup of coffee is prepared using a clean filter. Paper filters are healthier, more hygienic and require less maintenance. Additionally the high-quality brewer ensures optimal extraction. This all results in a superb taste of your coffee.

FRESH BREW

FreshMore

The FreshMore offers more than just black coffee — it also offers coffee specialties such as cappuccino, café au lait, moccachino and hot chocolate. All made with ground coffee and/or instant ingredients. Additionally you can select the required coffee strength and add milk to your cup of coffee.

FreshMore XL

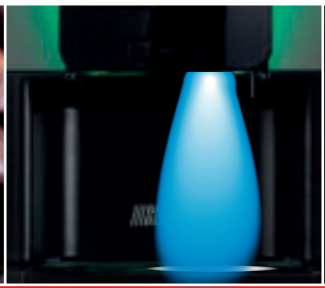
The FreshMore XL is similar to the FreshMore but offers more options for other coffee specialties. Some models have larger canisters for extra storage; other models have multiple canisters for extra ingredients such as ground coffee, decaf coffee, cocoa, sugar and topping. Additionally you can select the required coffee strength, add milk and add sugar to your cup of coffee.

FreshGround

The FreshGround is similar to the FreshMore, but every cup of coffee is made with freshly ground coffee beans (bean-to-cup) thanks to the high-quality grinder inside the machine.
This not only increases the *full fresh coffee experience*, but also increases the quality of the beverage as your coffee is made directly with the freshly ground beans.

FreshGround XL

This is the ultimate fresh brew machine. Every cup of coffee is made with freshly ground coffee beans and the machine offers a wide variety of coffee specialties (depending of the model of your choice). Additionally you can select the required coffee strength, add milk and add sugar to your cup of coffee.



LED backlight

You can set any colour or choose one of the five pre-set colours. Give your fresh brew machine a personal touch to match any environment!

Cup spotlight

As soon as you select a drink, the machine lights up the spot to place your cup. An indicator lamp tells you when your drink is ready.

Bean-to-cup

The transparent bean canister on top of the FreshOne G and FreshGround machines certainly improves the *fresh bean-to-cup experience*.
