Features

* Anyone can make rice balls just by pressing a POWER switch.
* You can control the Speed & Density of rice ball.
* Screw-typed mixing bars stir lumped boiled rice dispersing each grain.
* Relocation is easy for anyone with its compact desk-top size and light weight.
* We offer an upper hopper for mass production for free.
* Turntable sensor prevents rice balls from falling off the turntable by stopping the turntable automatically.
  It starts back itself, if you get rid of the rice ball on the top of the turntable.
* Easy to clean with water. (Water Proof, Coated in high quality Teflon)
* Easy to assemble and disassemble.
