P-LINE

P-LINE
DOMESTIC DIMENSION, PROFESSIONAL RELIABILITY

Perfect to be installed in small restaurant, camping, beauty centre, hairdresser or barber shops,… the IMESA P-Line assures high quality results and professional equipment reliability maintaining the compact dimension of the domestic equipment.

The P-LINE washing machine and tumble dryer are both equipped with frontal and top panel in stainless steel AISI 304: a smart and reliable structure!

Washing machine and tumble dryer were designed to be complementary: the dryer can be installed next to the washing machine or stacked on it.

Studied to last: a reliable structure and high quality components! We are proud of our product reliability in which we trust so much to grant the best warranty condition: **24 MONTHS TOTAL WARRANTY!**

Great Performance
100% customer satisfaction

A lot of available programs: thanks to the modern and professional microprocessor, the user can scroll the available washing or drying programs, choose the most suitable and start it.

Gentle wash for the most delicated garments: the special structure of the washing machine drum allows to treat the most delicated fibers with the maximum care and gentleness, avoiding a fast wear.

Safe and uniform drying: inside the tumble dryer drum the linen is oblige to a special movement, like an height, which assure a even linen drying. Thanks to the residual humidity control, the dryers gives back the linen with the correct humidity grade, avoiding damages to the fibers.

Easy-installation: washing machine and tumble dryers are available with different configuration to be suitable to any kind of installation.

Compact: dryer and washing machines can be stacked to occupy a very little surface.

P-LINE WASHING MACHINES

COIN OPERATED VERSION

P-Line washing machines are perfect to be installed in condominium laundry, a very diffused format in Center - North Europe, which is now taking off in other areas.

Sturdy, reliable and user-friendly, IMESA P-Line washing machines fit perfectly into student house laundry, small farm houses, campings, wherever it is needed a laundry area to be shared.

The flexibility of the microprocessor makes possible to connect the washing machine to more payment systems:

- Mechanical coin box;
- Electronic coin box;
- Cashless payment systems;
- Central cash;

PERFECT BALANCE

Quattro™ is the innovative shock absorber system equipping the P-LINE range. Four shock absorbers firmly fixed to a steel base: the washing machine can spin at maximum speed vitually without any vibration.

ENERGY SAVING

The washing machine is equipped with a cold and a hot water connection.
Thanks to this system, the hot water available in the net can be used, the washing program length is shortened because the heaters do not need to heat the water and energy is saved.

GENTLE WASHING

ActiveDrum™ is the innovative drum which equippes the P-Line range.
The central area holes are smaller to treat gently the delicated garments. The peripheric holes are bigger to make easier the evacuation.
The drum edge is angled to push the linen to the central area. The same role is played by the special shape of the lifters.

DRUM EASY CLEAN

Drum lifters are easy to be removed to make easier the drum cleaning.
Above all in case of MOP treatment, a removable lifter helps in the drum correct cleaning.

Great solutions for small laundries

The LM P model by IMESA is caracterized by a compact and smart design, which is perfect in case of small installation like esteticians or hair dressers.

Versatile and user friendly, the machine is equipped with a professional microprocessor which makes of the machine the ideal solution also for small farm house, pub, bar and backeries.

In the Coin Op vesion, the LM P washing machine matchs perfectly the requirements of condominium laundries or camping and residence laundrette.

- Top and frontal panel in stainless steel AISI 304;
- Free - standing;
- Microprocessor with 19 factory programs;
- 3 compartments detergent box;
- Strong door with double glass;
- Hot and cold water connection;
- Cylinder and outer drum in stainless steel AISI 304;
- Special drum structture for a gentle washing of the most delicated garments, but assuring a perfect evacuation;
- Holed drum lifter, which can be removed to assure a perfect cleaning of the drum, above all in case of MOP programs;
- Available in two versions: with drain valve or with drain pump.

CLEANING FIELD DEDICATED PROGRAMS

The LM P range washing machine is equipped with a special programs set dedicated to MOP and microfibers treatment.
Thanks to IMESA collaboration with the main players of the professional cleaning field, the LM P washing machine is able to fully meet the market request with five dedicated programs.

MEDICAL FIELD NEEDS HIGH HYGIENIC STANDARDS

Nursery school and small retirement homes must assure the highest attention to hygiene standards.
IMESA, for this reason, equipped the washing machine with a complete set of programs dedicated to disinfection.
This structures find in IMESA LM P washing machine a full answer to their special laundry needs.

The most flexible in its reference market

LM P washing machine is equipped with an intuitive microprocessor which allows a quick program selection and start.

The 19 factory programs can be partially modified changing some parameters. Three additional programs can be composed using the microprocessor available cycle and added to the standard programs.

CUSTOMIZED PROGRAM LIST

The microprocessor is equipped with 19 factory programs to which 3 free programs can be added.

The user can dispaly up to 10 programs, chosen among the 22 available.

HUGE DISPALY AND KNOB

To select and start the program, the user just need to scroll the list and press the START key when the program name is displayed.

During the program execution, the display shows all the information refering to the running cycle.

P-LINE TUMBLE DRYERS

Designed as complementary to the LM P washing machine range, the P-LINE tumble dryer mantain compact dimensions and a smart, clean style.

Versatile and easy to be used thanks to a professional microprocessor, the ES P model is equipped with the same necessary function of a professional tumble dryer, which is suitable to dry any kind of linen, also the most delicated. .
Ideal solution for farm houses, pub, bar, esteticians and hair dressers, the P-Line tumble dryer fit also in condominium laundry or small Coin Op laundry.

Professional drying in a small surface

- Top and frontal panel in stainless steel AISI 304;
- Drum in stainless steel AISI 304;
- Reversible strong door;
- Magnetic door lock;
- Double lint filter:
- Microprocessor with 7 factory programs;
- Linf filter cleaning request at display;
- Residual Humidity Control;
- Butterfly™ system to assure a perfect drying of the linen and to avoid wrinkles;
- Available in more versions: vented, with heating pump, condensed (only in case of 7 Kg. capacity)

GENTLE AS A BUTTERFLY

IMESA ES P series tumble dryer is equipped with a special system called Butterfly™.
Inside the drum the linen is obliged to a special movement, like an eight, which allows an even drying of the linen.

RESIDUAL HUMIDITY CONTROL

The tumble dryer is standard equipped with a special control system which stops the program when the wished residual humidity degree is reached.
Each one of the 7 installed programs can manage the temperature and the residual humidity degree necessary to receive back the garments with the requested standard: Extra dry, Dry, Normal dry, Iron dry.

Perfect drying, no risks for delicated garments

The ES P series by IMESA is equipped with a very intuitive microprocessor, which allows a quick program selection and start.

The microprocessor is equipped with 7 programs already tested and installed by the factory. Every program works automatically and stops when the set residual humidity degree is reached.

HIGH ATTENTION FOR THE LINEN

Thanks to the precise residual humidity control, the program stops exactly when the wished drying level is reached.
The progams with the higher temperature allow to shorten the drying time, the programs with lower temperature assure the most delicated fibers respect.

HUGE DISPLAY AND KNOB

To select and start the program, the user just need to scroll the list and press the START key when the program name is displayed.
While the program is running, the remining time is displayed.

COIN OPERATED VERSION

P-Line tumble dryers are perfect to be installed in condominium laundry, a very diffused format in Center - North Europe, which is now taking off in other areas.

Sturdy, reliable and user-friendly, IMESA P-Line tumble dryers fit perfectly into student house laundry, small farm houses, campings, wherever it is needed a laundry area to be shared.

The flexibility of the microprocessor makes possible to connect the tumble dryer to more payment systems:

- Mechanical coin box;
- Electronic coin box;
- Cashless payment systems;
- Central cash;

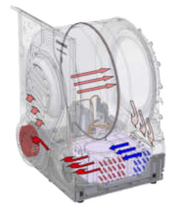
HEATING PUMP

The ES P model tumble dryer can be equipped by and heating pump system, an environment-friendly system which allows to drop the energy consums up to 0,20 kWh/Kg. avoiding also the problem of a humid air exhaust.

The air is headed by a condeser and pushed inside the drum where the wet linen is dried. The air passing through the linen is loaded with humidity.

The humid air is later cooled. Condensed water is drain using a tube or collected in a tank inside the dryer. The dehumidified air is heated again by the condenser and pumped back into the drum to dry the linen.

Thanks to the residual humidty control which equippes standard IMESA tumble dryers, the 7 factory installed program are all woking in a automatic way: the drying cycle stops only when the residual humidity degree of the linen correspond with the set value: Extra dry, dry, normal dry, iron dry.



EASY MAINTENANCE

The condeser filter is equipped with a water flush system to clean it. The water used is collected in a small tank which must be emptied when the request is displayed, more or less each 10 cycles.
