Ice Maker: IM-240ANE (23) / IM-240AWNE

Product Description

The IM-240ANE (-23) (air cooled) and the IM-240AWNE (water cooled) are modular cube ice maker. These products produce up to 240kg per 24 hours and can be used in combination with all available bins.

- A closed water circuit offers the ultimate contamination protection, by reducing the number of points at which impurities can enter the ice making process.
- Hoshizaki ice makers are micro computer controlled, controlling the ice making process to perform at its best under varying circumstances, without having to make physical adjustments.
- A stainless steel exterior provides a hygienic and high quality finish.
- Foam injected polyurethane for insulation (HFC free), helps preserve the quality and consistency of the ice produced, reducing the number of production cycles.
- An easily cleanable air filter allows end users to carry out a routine cleaning schedule, extending product life expectancy and reducing the frequency and costs of maintenance call-outs.

Ice Type: Cube

IM-240ANE / IM-240AWNE
Ice Size: Standard (L) 28 x 28 x 32mm

IM-240ANE-23
Ice Size: Medium 28 x 28 x 23mm
