Induct.range Metos Ardox I4-H 400V 3N 50Hz

Induction range, 4 zones, each 3,5 kW, total 14 kW
Diameter of the zones 260 mm.
Dimensions 800 x 800 x 900 mm.
Made completely out of stainless steel.
Height-adjustable stand 700-900 mm, with a stainless steel shelf.
Fast, efficient and safe.
- Induction range produces virtually no excess heat to the kitchen
- Considerably faster than an electric or gas range
- Immediate reaction to power adjustment
- The range itself does not warm up and is always cooler than the cooking vessel
- Spill-overs do not burn in the cool surfaces
- Heat is produced only when a cooking vessel with min diam. 120mm is on the zone
- Energy consumption significantly lower than that of an electric range
Because of the operating principle, the cooking vessels used must have a magnetic bottom.
Best results can be achieved with steel vessels with either sandwich or compoind bottom.
Most cast iron cooking vessels work.
Aluminium vessels are not recommended and they usually do not work.

Product number	4210019
Product name	Induct.range Metos Ardox I4-H 400V 3N 50Hz
Size (mm) (w * d * h)	800 * 800 * 900
Weight	60,000 KG
Capacity	
Technical information	400 V, 32 A, 14,1 kW, 3PE, 50 Hz
