COOLING PLATES

Keep food perfectly chilled for your buffet service

Freeze the stainless steel freezer packs for 8 hours before use.

Those packs cool yoghurts, fruit salads, and cold appetizers directly in contact with the stainless steel for optimal temperature. Cooling plates can be placed on buffet tables or gastronorm trays to retain condensation.

TABLECRAFT RECOMMENDED CARE & USE FOR YOUR PRODUCTS

Acrylic

When cleaning your acrylic pieces, do not use abrasive cloths or paper towels. Always be sure to use a microfiber cloth to prevent scratching. To sanitize, use warm water mixed with sanitizing dish soap, Hydrogen Peroxide (3%-5% Concentration), or a bleach-water solution (2% Concentration of Bleach). To prevent damage to the surface of your acrylic shield, avoid using ammonia or alcohol based cleaners.. Do not put in the dishwasher. Not microwave or oven safe.

Melamine

Dishwasher safe. Due to the size of some pieces, hand washing is best. We recommend to use a soft cloth and mild detergent, then towel dry. Not microwave or oven safe. Safe for temperatures up to 100°C.

Enamelware

Vitreous Porcelain Enamel Coated Steel Enamelware is a time-honored traditional cooking and serving vessel that has been used for centuries in many ways. A good quality enamelware product can last for years under the right conditions and cared for correctly. Just like any other porcelain piece in the market, porcelain enamel coated steel is not chip resistant and can become worn over the years. The steel substrate of the products is incredibly strong; however the porcelain coating is susceptible to chipping if handled roughly or repeatedly dropped on a hard surface.

To extend the life of your enamelware products, we recommend that you wash before use, do not use abrasive cleaning or scouring pads, do not place empty enamelware on heating element or allow to boil dry on induction unit, gas or electric hobs. Also, before use, coat with a light coating of cooking oil to protect the enamelware from staining. After use, to remove baked on food or stains, soak in warm soapy water and wash gently with non-abrasive liquid detergent.

Enamelware products are commercial dishwasher safe (high & low temp), induction and freezer safe, and safe for direct flame. Not microwave safe.

Porcelain

All pieces are dishwasher and microwave safe. We recommend to use a soft cloth and mild detergent, then towel dry.

Polyethylene/Plastic Bottles

Dishwasher safe (low temperature). Not microwave safe.

Recycled Green Glass

Dishwasher safe. Due to the nature of recycled glass, it is common to notice bubbles and small lines in the finished product. These characteristics are natural qualities of recycled glass — no two pieces are exactly alike. Not microwave or oven safe.

Stainless Steel

Dishwasher safe. For best results, we recommend to hand wash with a soft cloth and mild detergent, then towel dry immediately to maximise their beauty. Do not wash with harsh or abrasive cleaners. Do not allow product to soak in water for extended periods of time (will prevent rust). Not microwave safe.

Galvanised Steel

Hand wash with a soft cloth and mild detergent, then towel dry.

Do not wash with harsh or abrasive cleaners. Do not allow product to soak in water for extended periods of time (will prevent rust). Not microwave safe.

Black Metal / Chrome Plated Baskets or Racks

Hand wash with a soft cloth and mild detergent, then towel dry. Do not wash with harsh or abrasive cleaners. Do not put in the dishwasher.

Polypropylene Baskets

Dishwasher safe (low temperature). Not microwave or oven safe.

Ridal Collection™ Baskets

Dishwasher safe (low temperature). Microwaveable for limited reheat use. Not oven safe.

Willow

For best results, we recommend to hand wash with a soft cloth and mild detergent, then towel dry. Do not wash with harsh or abrasive cleaners. Do not put in the dishwasher.

Polyethylene/Plastic Baskets

Dishwasher safe (low temperature), microwave safe (for re-heat only) and heat lamp safe up to 65°C.

Wood Products (Acacia, Ashwood, Bamboo, bread boards, pepper mills, etc.)

Hand wash with a soft cloth and mild detergent, then towel dry.

Do not wash with harsh or abrasive cleaners. Do not put in the dishwasher. Do not let product soak in water for extended periods of time (prevents splitting).

ETL® Listing

CW40164, CW40162, CW40160, CW30159, CW30157, CW30158.

The ETL Listed Mark is proof of product compliance (electrical, gas and other safety standards) to North America safety standards.

NSF® Listing

This catalogue was produced January 2021. Item listing is constantly updated, please see NSF®.org for the latest listing information.

Stainless Steel (Tri-Ply)

Stainless Steel cookware is dishwasher safe. However, we recommend hand-drying the cookware immediately after the rinse cycle or hand-washing and drying to preserve the original finish. Prolonged exposure to high heat settings may cause your cookware to discolour. To recondition your cookware or to remove stubborn spots and stains, use a nonabrasive pad and quality Stainless Steel cleanser such as Bar Keepers Friend®.

Cast Iron

Our line of Cast Iron is pre-seasoned, however it is still important to seal the surface of cast iron through a process called "seasoning". This makes the cookware less likely to stick, protects it from corrosion and rust, and prevents food from taking on metallic flavors. With proper care, a well seasoned pan will only get better with time and last for years.

To re-season, allow cookware to cool before cleaning. Wash the pan thoroughly in hot soapy water, then hand dry immediately. Using a cloth or paper towel, grease the pan thoroughly with a thin coating of vegetable oil or melted vegetable shortening. Be sure to coat the entire surface, including all corners. Heat the oven to 175°C. Place the cookware in the oven for 1 hour. Remove while hot and allow to cool to room temperature. Wipe away any excess oil, being careful not to scrub clean, then store.

To preserve the seasoned finish, cast iron must be cleaned differently from other types of cookware. Cast Iron should never be placed inside a dishwasher or scrubbed with scouring pads or steel wool.

Instead, wipe the pan clean with a sponge or dishcloth in hot water, without detergent. Any residue may be removed by boiling a little salt and vinegar in the pan, or by rubbing with a paper towel and coarse salt. Hand dry immediately after washing and brush with a thin coating of vegetable oil before storing. If stacking pans, place a paper towel between them. Pans should be seasoned from time to time when needed.

Cast Iron (cont.)

Cast iron cookware is heavy and care should be taken when lifting; where available, use side handles for extra stability. Always use heat protection gloves as handles will become hot.

Cast Iron is not microwave safe. Safe to -17°C.

Cast Iron Rust? Don't panic, it's not broken. Without protective seasoning, iron can rust. To fix, scour the rust, rinse, dry, and rub with a little vegetable oil. If problem persists, you will need to thoroughly remove all rust and follow our re-seasoning instructions.

Cast Aluminium—Natural Finish

The "Naturals" are made of a food safe cast aluminium without coating and are NSF® approved. These items can endure temperatures from -28 up to 230°C. For best results, we recommend to hand wash with a soft cloth, then towel dry immediately to maximise their beauty. Staining will occur if acidic foods are put into the natural products.

Cold Serving Cast Aluminium—Coated

All Coated Cast Aluminium products are NSF® approved and will endure temperatures from -28 up to 63°C. (DO NOT BAKE in the coated cast aluminium products). If a defect in the coating appears, such as peeling or chipping, the product must be taken out of service immediately and repaired or replaced. The intended purpose of the colour coated products is for cold serving & display only. They are not to be used in the preparation of food. Some environmental uses are, but not limited to, buffet lines, catered environments, and in food display cases. Do not cut directly on the products, as this will cause the coating to scratch. Do not put any of the products in an oven, on a stove top, under a heat lamp or in any other condition where the temperature exceeds 90°C. Washing by hand is recommended, but when using a non-caustic detergent, the coating is dishwasher safe. Do not clean with scouring pads. Only use nylon or sponge pads. Regular dish washing will dull the coating. Do not use metal utensils on the colour coated products.

NOTE: Staining of all colour coated products will occur especially if used with acidic foods. The lighter (white, sky blue, and grey) colours are more likely to show stains than darker colours. Staining of products is not covered under warranty.

Aluminium

Not Dishwasher Safe. Wash by hand using a cloth, warm water, and dish soap. Dishwashing will cause discoloration of your aluminium kitchenware.
